## PRODUCT INFORMATION

### Clean and care

#### MIRRORS, GLASS AND METAL CLEANING

We recommend regular cleaning with a mild, soapy solution and then wipe off with a dry cloth. Use of cleaners containing abrasive or corrosive substances, such as ammonia, will destroy the product.

#### CERAMIC CLEANING

Clean with a mild detergent. Cleaners containing abrasive materials should not be used. Black marks, which appear when in contact with metal objects, can be removed with a ceramic eraser.

#### BOND BLACK AND BLACK TAPS

We recommend regular cleaning with a mild, soapy solution and then wipe off with a dry cloth. Use of cleaners containing abrasive or corrosive substances, such as ammonia, will destroy the product.

#### BOND POLISHED BRASS ACCESSORIES AND TAPS – MP CODING

We recommend regular cleaning, or when necessary, with soap and water or a light detergent and then wipe off with a dry cloth. These products are polished from production. The surface of these products is unlaquered/ without protection meaning that it will change over time. The surface is 'living' and with normal usage these products will tarnish and get darker – patina. Please ensure that this finish is to your preference before making your purchase.

The patina/ tarnish can be removed by using brass polish – please seek advice of a specialist and take care not to use polish on other surfaces.
